# Pradeep Kagithalagudem

## SUMMARY

- **Enterprise Software Architect & Technology Leader** specializing in designing and architecting high-performance distributed systems, scalable Java microservices, and multi-tenant platforms.
- **Architectural Expertise:** Expert in translating complex business requirements into robust, fault-tolerant architectures that operate with zero support overhead.
- **Engineering Efficiency & Leadership:** Consistently drives engineering efficiency by designing reusable enterprise frameworks, refactoring design and codebases to improve performance and maintainability.
- **Autonomous Innovation:** Committed to driving continuous architectural improvement and efficiency, with a strong track record of executing mission-critical projects seamlessly within distributed, remote team environments.

## SKILLS

- **Languages & Frameworks:** Java, Spring Boot, Spring AI, Python,Fast API, LangChain, JSP, EJB, Struts, PHP
- **Web Development & UI:** HTML, CSS, JavaScript, Node Js, React and Swing
- **Databases:** MySQL, PostgreSQL, MongoDB,SingleStore DB and Qdrant Vector Database
- **DevOps, Infrastructure & AI Tooling :** Docker, Kubernetes, AWS, CI/CD pipelines, Claude Code CLI, Aider

## EMPLOYMENT

**Senior Software Engineer** — **Apple** — **Nov 2020 – Jul 2026**

- Led 5+ cross-functional projects with teams of 3-5 engineers, delivering robust enterprise applications that power critical business operations.
- Architected a reusable framework for Planning Applications that **reduced development time by 40%**, adopted for 1 production application with expansion planned across multiple business teams.
- Engineered performance and scale enhancements across high-volume Java microservices, partitioning POR workflows by GEO and tuning concurrency to **unblock SLAs for APEX**.
- Built an AI-powered **semantic search service** for QA test case management using **Qdrant vector DB** and cosine similarity to identify duplicates and eliminate test redundancy.
- Mentored 2 junior developers, both of whom progressed to independently owning and delivering projects.

**Principal Engineer II** — **Progress Software** — **Sept 2013 – Sept 2020**

- Led a team of 4 developers on the HDP product, delivering **5 major releases** over 3 years.
- Owned end-to-end development of 2 products: **Hybrid Data Pipeline (HDP)** and **S4HANA JDBC Driver**.
- Architected **External DB & OpenEdge support for Rollbase**, enabling app creation on legacy data, document attribute handling, and external auth integration.
- Architected a 3-tier IP Whitelist feature (system, tenant, user levels) to meet enterprise compliance requirements, with **less than 5ms latency overhead** across all API calls.

**Senior Associate** — **Cognizant Technology Solutions** — **May 2010 – Sept 2013**

- **Sole developer** of the full NCCM (Network Configuration and Change Management) Swing UI application, building 25+ screens across 5+ modules serving 50 users.
- Designed and implemented an RBAC authorization framework from scratch with 4 roles and granular read/edit permissions, introducing access control where none previously existed.

**Software Engineer** — **Amber Road** — **JUN 2009 – May 2010**

- Engineered a flexible **CSV export functionality** for Purchase Orders, Invoices and Shipments, simplifying data management processes.

## KEY ACCOMPLISHMENTS

- **Project & Technical Leadership:** Successfully led cross-functional teams and engineered frameworks that seamlessly bridged technical architectures with business user needs.
- **Process Efficiency:** Spearheaded SDLC optimization initiatives by enforcing mandatory unit testing and Sonar quality gate checks for every check-in, cutting project delivery timelines and significantly boosting operational efficiency.
- **Tooling Innovation:** Built an ANTLR-based DSL parser (TDM CLI) executing SQL-like English statements to automate task chain metadata updates, reducing a weeks-long process to minutes.

## EDUCATION

- **B. Tech Computer Science & Engineering**, JNTU University
- **Diploma in Computer Engineering**, S.B.T.E.T
